Subject: NIH ketone ester for Coronavirus treatment?

Dear Dr. Fauci

There was a paper recently showing a ketogenic diet helped tame the general flu, in mice.

Meanwhile, there is a drink developed via DARPA and NIH (Dr Veech) that mimics the benefits of the diet. It is called a ketone ester. Even shown to block effects of nuclear bomb style radiation (LD-70 to 100% survival).

Who can I soak to about testing this drink on mice for the general flu , or even humans with Coronavirus symptoms?

Can I send you the paper?

Thank you,

Frank Llosa
