**Subject:** TytoCare: COVID19 Telehealth Support  
**Importance:** High

Hi Dr. Fauci – good evening. I represent TytoCare, a company that built the industry’s first and only all-in-one medical device that pairs with a virtual exam, going beyond the means of audio and visual. TytoHome, an OTC and FDA approved/cleared device is meant to either synchronously or asynchronously examine a patient with capabilities to capture heart/lung/gastrointestinal sounds, ear/throat/skin exams, and temperature.

Due to the outbreak of COVID-19, Tyto has experienced an influx of orders worldwide to support those that need to be monitored when quarantined. I would like to offer Tyto’s assistance here in the U.S. and think through ways and opportunities that the product can make a difference.

Please see a few a couple of examples on how Tyto is making a difference below:

- **Patient Quarantine/Discharge at Home**
  - Design: patients receive TytoHome or have it delivered for remote evaluation by infectious disease specialists
    - Example: [Home Admission Service with TytoCare](#)
- **Create & manage quarantine locations, onsite or offsite**
  - Setup: Patients do a self-exam with TytoClinic while a provider evaluates them from a distance
    - Patient is remotely guided to fully disinfect the device and station before it’s returned to staff for a second round disinfection
    - Example: [Nursing Home Triage](#)

Thank you for all that you do during this difficult time.

Thanks,  
David
