

**To:** Fauci, Anthony (NIH/NIAID) [E] (b) (6) >

**Subject:** A humble request for your wisdom

Good evening!

I know you must be completely busy and inundated with people wanting your time. I apologize that I have nothing to offer in return and completely understand if you don't have time to answer. I called the CDC but they were totally unhelpful. I have a question that makes sense to me and I was hoping you could answer and the answer might help a lot of people.

I understand that over time I, and everyone else, will very likely get COVID-19 and that most people won't even realize it because it will be minor. I get that, so this is not a panicked question.

I also understand that while most cases will not be severe, the bad cases are complicated by pneumonia.

So my question is: If someone has been vaccinated against pneumonia, will that offer any protection in the event that they do contract COVID-19 and perhaps provide some barrier against the worst effects?

Thank you for your time if you have read this and I apologize if this is just another in a long line of ignorant questions, but it made sense in my brain so I thought I would at least ask.

Be well, be happy, and may life be kind and generous to you, those you love, and those who love you!

sincerely,

Aliantha Angel
