Fred:

Thanks for the note. The answer is almost certainly yes, but there would not be enough of them whereby we can compare the results in those who were receiving Hydroxychloroquine or not for their lupus. Large natural history studies, which we will be initiating could possibly answer that question.

Best regards,  
Tony

U gave me your email at the Capitol briefing. Question, with all the discussion on hydrox.—have there been any Covid-19 cases that have struck lupus victims? TY
